

Basileo: Greek Myths seen with the eyes of a child!

Let yourself be carried away by the fascinating world of Basileo,
the little hero that will captivate children and adults!

We are about to tell you a big secret... Do you know who defeated the Minotaur? And the Gorgon Medusa, and Polyphemus the Cyclops? It was **Basileo**: a little upside-down centaur, with the body of a man and the head of a horse. And this new App was born to tell you his whole incredible story.

...Do not tell Homer though, otherwise he will have to rewrite his poems all over again!

Basileo is a series of entertaining Apps for iPad **specifically designed for children**, to teach them about the most famous Greek myths in a fun and interactive way. Each page of the story can be read or heard by a narrator's voice in four different **languages**.

Kids can embark on a magical journey through Ancient Greece, accompanied by incredible hand-made **illustrations**, fascinating **music** and an original soundtrack. The little readers will never cease to be amazed, each time discovering new **interactive games** on every page and **drawing their own stories** within the App!

"**Basileo and the Labyrinth**" is the first episode of the saga. It is an original work, based on the Greek myth of *Theseus and the Minotaur* and thought to make children's reading and learning time the most enjoyable.

Basileo was realized on MakeItApp.eu, a platform where users, experts in any field, can create apps together, for free and sharing the future revenues. Create your own app on www.makeitapp.eu!

The app Basileo was proposed on MakeItApp by illustrator Giuseppe Ferrario and writer Demetrio Bargellini, who collaborated with other enthusiastic users met on the platform: developers, designers, translators.
